

ENERGY POLICY

of Unitsky String Technologies Inc.

We are preserving the treasures of the Earth by conserving energy and resources!

Our mission:

- Developing and marketing energy-efficient, eco-friendly, secure, reliable, and comfortable innovative string transport, contributing to a significant reduction in greenhouse gas emissions into the Earth's atmosphere and improving the quality of human life.
- Ongoing energy conservation, enhancing energy efficiency, and decreasing the energy consumption in production processes associated with the design, advancement, and infrastructure development of cutting-edge string transport complexes.

To attain the Strategic Objectives and adhere to the principles of the Energy Policy, the top management of Unitsky String Technologies Inc. commits to the following:

- Reducing costs in the company's operations by saving fuel and energy resources and continuously improving energy efficiency.
- Complying with legislative and regulatory requirements regarding the use of energy resources and energy efficiency, applicable to the company's activities, and requiring compliance from contractors, suppliers, and visitors.
- Ensuring the development, production, and construction of string transport systems with consideration of their energy efficiency.
- Establishing measurable energy goals and objectives aligned with the best global practices.
- Providing all necessary resources, including informational support, to achieve the set goals and objectives in improving energy efficiency.
- Ensuring compliance of the existing energy management system with the requirements of the international standard ISO 50001:2018 and the national standard GOST ISO 50001-2021, guaranteeing its continuous improvement and enhancement.
- Taking into account energy efficiency indicators affecting the company's energy performance when procuring products, equipment, and services.
- Ensuring the rational use of all types of resources in the production process through strict control.
- Improving the motivation and reward system to engage every employee in achieving the company's energy goals and foster an understanding of personal responsibility for results.
- Guaranteeing transparency and openness in the company's energy management activities for the public, regulatory bodies, and other stakeholders.
- Ensuring an appropriate level of competence and continuous professional development of personnel in energy conservation and efficiency.

The top management of Unitsky String Technologies Inc. assumes responsibility for implementing the stated Policy, communicating and explaining its provisions to all personnel, as well as analyzing and improving the effectiveness of the existing energy management system.

Adhering to the provisions of this Policy is both a duty and an honor for the entire team at Unitsky String Technologies Inc., as the rational use of fuel and energy resources is one of the corporate values.
